1. The minimum spread refers to the minimum spread level under normal circumstances, which may be widened if the market fluctuates sharply or the liquidity is insufficient.
2. The Locking Position Margin is equivalent to Initial Margin for each Lot
3. You can place orders by choosing market price or a specific limit price. As the market price keeps changing, the price you see when placing an order may differ from the strike price, and the limit order price is likely to differ from the default price.
4. If the account balance is insufficient when the new limit order is triggered, the order will not be partially or fully traded. The limit order is valid and available in any trading

day or time.

5. If the position is held later than Beijing time 6:00am (5:00 am during summer time), interest will be incurred.

If you have not close your position at the close of the trading day on Wednesday (i.e., early Thursday morning), three-day rollover interest will be incurred.

6. Overnight Interest Calculation

6.1 Currency Pair involved USD:

6.1.1 Base Currency - USD: $\text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days}$

6.1.2 Base Currency is not USD: $\text{closing price} * \text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days}$

6.2 Cross Currency:

6.2.1 To know more about the overnight interest calculation of EACH cross currency, please contact our CS team.

Example1: EUR/JPY = $\text{closing price} * \text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days} / \text{closing price of "USD/Counter currency"}$

Example2: EUR/GBP = $\text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days} / \text{closing price of "Base currency/USD"}$

6.3 Precious metals:

6.3.1 XAUUSD: $\text{opening price} * \text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days}$

6.3.2 XAGUSD: $\text{opening price} * \text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days}$

6.3.3 HKGHKD: $\text{trading lot} * \text{overnight interest amount} * \text{days}$

6.3.4 RKGCNH: $\text{opening price} * \text{contract size} * \text{trading lot} * \text{overnight interest rate (\%)} / 360 * \text{days} / \text{exchange rate of USDCNH}$

6.4 Energy (USD):

6.4.1 $\text{trading lot} * \text{overnight interest amount} * \text{days}$

6.5 Indices:

6.5.1 JPN225: $\text{trading lot} * \text{overnight interest amount} * \text{days} / \text{closing price of USDJPY}$

6.5.2 GER30: $\text{trading lot} * \text{overnight interest amount} * \text{days} * \text{closing price of EURUSD}$

6.5.3 China50 & US30: trading lot * overnight interest amount * days

6.6 The annual interest rate will be determined by reference to the relevant market interest rate of at that time and will be post on our EMXpro MT4 platform.

6.7 We will not pay any interest on the temporary margin in your account.

7. Liquidation

7.1 If the equity/margin ratio is equal to or below 50% due to price fluctuations during our trading periods, liquidation at current market price will be triggered. Our online trading system will close open positions with the greatest unrealized loss first, followed by the next largest losing position and so on, until the maintenance margin requirement is satisfied or exceeded.

7.2 If the equity/margin ratio is less than 100% before the weekends and holidays, it will trigger the forced liquidation of the market, and the last traded order will be partially or completely closed first until the margin is sufficient.

If there is an imbalance between the long and short positions in the lock-up situation, part or all of the last traded order with more lots on one side will be closed first, orders with less lots on one side will not be closed, until the margin is sufficient or until the lot size of long and short positions became the same. The lock position of the balance of long and short positions will not trigger the forced liquidation of the market.

7.3 If the market prices move sharply due to large fluctuations or other reasons, it is possible to occur liquidation and negative balance.

8. Phone Dealing

8.1 To provide clients with the convenience to trade then internet is inaccessible to them, we have set up a special dealing hotline with service charge USD20 per transaction. In the event of computer failure at our side and/or internet trading is temporarily suspended, using our phone dealing services will not incur any charges. Dealing Hotline: 4008428928
